The Genetic Event of the Year

Advanced BEEF GENETICS

Success is about taking advantage of opportunity, and we are excited to bring you the best opportunity for success this year has seen! Welcome to the Advanced Beef Genetics' Complete Female Dispersal Sale.

MIKE HENDERSON FAMILY >>

The decision to have a dispersal wasn't easy. For us at Advanced Beef Genetics, the commitment to efforts off the farm lead us to decide to offer the entire Advanced Beef herd to our fellow cattle producers and Simmental enthusiasts. We have been pursuing genetic improvement for many years and are extremely proud of our ability to offer genetic excellence with amazing type and kind.

Over the past seven years, we have marketed more than 500 herd bull candidates through our cooperator relationship with the RA Brown Ranch in Throckmorton, Texas. Our confidence in the hybrid vigor of SimAngus cattle translated into bull candidates that would consistently create value for commercial cattlemen. These SimAngus herd bulls have influenced some of the nation's top commercial herds and demonstrated the value of both the Angus and Simmental breeds. Our program has committed to genetic standards while not sacrificing those attributes like feet, udder and disposition that define profitable beef production.

REX HOPPES FAMILY >>

We have taken great pride in establishing trait selection targets for calving ease/birth weight, growth, maternal and carcass traits. Our high genetic standards have guided breeding decisions and anchored how we managed the cow herd with discipline to consistently achieve those goals. In the group of spring females selling December 19th, 55% rank in the top 10% of the breed for API and 51% rank in the top 10% for TI. Those rankings hold true for all the fall calving females as well. Genetic improvement for almost any herd can be captured at this dispersal event. You will also find some of the most trusted SimGenetic sires represented in the cow families that have been built at Advanced Beef Genetics.

STAN PEARSON FAMILY >>

Please find this as our personal invitation to join us in Wiota, Iowa for the "Genetic Event of the Year." Every female that has been a part of the Advance Beef Genetics spring and fall calving herds will be offered for auction. This is not a herd reduction sale; nothing is held back and we are excited to see how these females influence other herds across our great nation.

One of the great rewards from being a part of the beef industry and Simmental breed has been the amazing friendships, mentors and fellowship of customers, friends and other breeders. In advance of the sale please feel free to call or stop and view the cattle at your convenience. We thank you for your interest in the cattle and look forward to seeing you on December 19th.

Mike Henderson, Rex Hoppes and Stan Pearson

BREEDING INFORMATION

Spring Calving Females: The spring calving cows and bred heifers sell with ultrasound work done by Toby Muller at Ultra Ova. All the breeding information regarding AI and pasture exposure information is included in this sale book below each lot. The information is correct to the best of our knowledge. All spring calving females sell as is and pregnant at the time of sale with no further guarantees.

Fall Calving Females: The fall calving pairs have been pasture exposed to Redhill Countryman 81J (turned in on 10/30) and Brown RRR Emblem J3541 (turned in on 11/3) for a 63-day breeding window. Each sire is running in his own breeding pasture with his own group of cows. The pasture exposure information for each female is listed below each lot. The fall calving bred heifers were synchronized and AI bred on 11/11/23 to C-3 Next Up NS B220 J939, then pasture exposed to KM Clarified 214 on 11/20/23. All fall calving cows and bred heifers will run with the pasture exposure sire until sale day.

IMPORTANT FALL BREEDING INFORMATION: If the buyer wishes to take the fall pair or fall bred heifer home on sale day or shortly after the sale, they can do so. However, they do so realize that the female is sold as exposed and not guaranteed to be pregnant.

Fall Breeding Guarantee: Buyers can leave their purchase of a fall calving female at Advanced Beef Genetics to be turned back out with the pasture exposure sire until February 1, 2024. A charge of \$3.50/head per day will be charged to the buyer until the time of pick up. On or about February 1, 2024 the females will be pregnancy checked and called bred or open. If a female is open at this time, a \$500 credit will be given to the buyer on purchases of \$3,750 or more. *If you take this option, we strongly recommend purchasing insurance for your Fall Pair and/or Bred Heifer as Advanced Beef Genetics assumes no liability for death or injury past the day of the sale.*

INSURANCE

Advanced Beef Genetics recommends you insure your cattle purchases. Insurance will be available on sale day to insure your purchases.

TRUCKING

We will help buyers arrange transportation for cattle purchased.

REGISTRATION AND TRANSFER

Registration certificates will be transferred to buyers upon request at the seller's expense. When making settlement, buyers must give complete written name and address information for making transfers.

EPDS

All cattle will be registered in the American Simmental Association. All EPDS are the most current BOLT at the time of printing conducted by IGS and the American Simmental Association. Please note that EPDs may change from the time the sale catalog is printed until registration papers are transferred.

HERD HEALTH

All cattle have health papers and are ready for interstate shipment.

Every animal in the Advanced Beef Genetics breeding herd is properly vaccinated and boosted annually for IBR, BVD Types 1 and 2, BRSV, PI3, Lepto Vibrio, 7-Way Clostridium, Pasturella and Haemophilus Somnus. All females are vaccinated for Brucellosis. All animals have been treated to internal and external parasites.

COMPLETE DISPERSAL

December 19, 2023
12:00 PM CT - Wiota, Iowa

The Genetic Event of the Year

People. Performance. Profit.

Founded on these principles, **ADVANCED BEEF GENETICS** is committed to the success of commercial cattle producers and those who value the benefits of SimAngus™ genetics. The partners leverage considerable experience in the commercial bull business, broad agricultural knowledge, and a formidable dedication to customer service.

Take advantage of the many years of strategic breeding in this elite dispersal offering. For decades, we have selected for cattle with striking phenotype and breed-leading EPDs.

PEOPLE. The relationships Advanced Beef has built within the cattle industry has been a top priority, and adding value to the customers' operation has been paramount. Time spent on local, national and international relationships translated into increased value for Advanced Beef customers. Building on the advantages of heterosis, Advanced Beef has been committed to bringing you the best in Simmental and Angus genetics.

PERFORMANCE. Visiting SimAngus seed stock programs across the country and seeing hundreds, if not thousands, of cattle each year gave Advanced Beef a greater understanding of the genetics being used to further the genetic progress of this herd. This translates into more predictable genetics now being passed on to you.

PROFIT. Providing high-performing SimAngus bulls year after year to increase our customers' success has been goal number one. Utilizing genomic enhancement, EPDs, performance testing, ultrasound, AI, in vitro fertilization and embryo transfer, has helped Advanced Beef maximize animal performance and efficiency. Using the vast technology and data available today helps us bring a better product to the genetic marketplace.

Genetic Value of the Sale Offering:

	AVE \$API	AVE \$TI
2023 Born Bull Calves	169.7	96.3
2023 Replacement Heifers	168.6	95.9
2022 Born Bred Heifers	165.8	93.7

“Years of commitment and genetic improvement for every economically important trait are paying off for the customers of these herds”

-Marty Ropp, Allied Genetic Resources

FROM THE SALE MANAGER

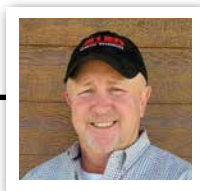

We have coined this sale “The Genetic Event of the Year” and boy does this offering back it up. Mike, Rex, and Stan have spent over a decade breeding Simmental and SimAngus cattle focusing tirelessly on making cattle that cover all the bases relevant to the cattle industry. They have used all of the technology that is available to make the best breeding decisions as well as the heavy use of AI, embryo transfer and purchasing some of the top bulls available to use as pasture sires. They strive for excellence with every calf crop and they have studied the direction that the industry is trending over the years. This has made this cow herd elite by many standards.

As you flip through this sale book you will notice that the EPDs are eye popping, with many ranking at the top of the breed for numerous traits. You will also notice the importance placed on great cow families that keep pushing this herd forward with the use of embryo transfer. All of this while not sacrificing phenotype. This group of females has an impeccable look. They are high volume, heavy muscled, attractive cattle with exceptional feet and udder quality.

With all of that said you can see why this is “The Genetic Event of the Year.” This is an opportunity that does not come along very often to add genetics of this quality in volume. If you are serious about the business, you should take a hard look at this offering, I am confident you can find a female, or multiple females, that can advance the genetic base in your herd. Opportunities like this do not come along very often - take advantage of this great opportunity.

Sincerely,
Marty Ropp, Corey Wilkins and Jared Murnin

ADV MS GENESIS J1017 >> Sells as Lot 1.

L3574 >> 2023 son of Lot 1 by Hook's Galileo 210G who boasts a \$API of 207 and \$TI of 117.

Sells open and ready to flush.

J1017 exemplifies the genetic excellence that we have committed to at ABG. She is advanced in her genetic value and physically elite. Moderation of frame, ideal feet and legs, impressive udder quality are all here. Her first calf sired by Galileo might just make this young cow a household name in the Simmental business. There are not a lot of purebred females here at ABG, but if you are in need of a donor dam, here she is. Only in a complete dispersal do females of this value and quality sell.

Future Donor

J1027 is backed by the great TNT R77 donor. For those that might not know or remember, R77 was the dam to TNT Dual Focus T249. No doubt Dual Focus has been one of the most influential sires in the ABG history that built amazing SimAngus cattle. We believe the CLRS Inspired calves could add huge value to these females.

AI bred 5/26/2023 to CLRS INSPIRED 0110K (4031996). PE 5/31/23 TO 9/12/23 to KM CLARIFIED 214 (4263232, AAA 20322913). Confirmed safe to PE. Due 3/20/2024.

K2008 is a JC Talon daughter that is out of a Frontline x 505B dam. That cow has an awesome Eagle sired heifer calf in the group of opens. I like this mating to KM Clarified 214 and the consistency of the cow family.

 A Diplomat daughter that does so much right. At ABG we have worked hard to develop moderate framed cows that have stayed away for either of the extremes. Cows that are "just right" in terms of mature cow size yet we have not wanted to give in the performance area. H0023 is a great example.

You will find a number of these mature cows carrying embryo pregnancy's by the great Brown Ms Quannah 505B. Many of these cows carrying pregnancy's absolutely have the genetic merit to blaze their own path. We have long used the philosophy that if the donors dams have the value to be flushed, we needed to make live calves as quickly as possible.

There are 3 different embryo mating's in these pregnant recips. Genesis, Reserve and Honor. In each case you are talking about some exciting SimAngus genetics by one of the most unique Angus females being replicated into the Simmental population. Here is an example of cow power even though she is carrying a 505B pregnancy.

If you have flipped through the catalog you will see how much influence this donor dam has had on our program. Her dam was a Shear Force cow that would have had an even greater impact at ABG had we not lost her to lightning. A384 has 15 direct daughters in the dispersal to her credit.

L3010 >> Daughter of Lot 99. Sells as Lot 127.

J1541 >> Daughter of Lot 99. Sells as Lot 166.

J1021 >> Daughter of Lot 99. Sells as Lot 14.

J1025 >> Daughter of Lot 99. Sells as Lot 15.

The Cornerstone of the Program

SPRING BRED COWS

K2513 >> Daughter of Lot 100. Sells as Lot 226.

 As a long time cooperator for the RA Brown Ranch, we launched into building some elite red SimAngus genetics. The group of red SimAngus opens here are the result of our first group of F1 reds being born at ABG. We used GW Hilger One to inject some of the most balanced trait genetics into these reds. The dams of these were our selections of the most elite Red Angus females from the Ludvigson Stock Farms dispersal with All Beef.

Rank	99	45	85	25	75	25	20	

Sells open. We intentionally mated Capitalist to some of the best Admiral daughters. L3034 is another example. Look up this one's dam, she is impressive. The dispositions of the Capitalist are not perfect but we have found them to be very manageable and we are not easy on cows with less than desirable dispositions. Ask us our experience but since we have continued to use him for the unique genetic package you probably know what our feedback will be.

AI bred 11/11/2023 to LBRS Genesis G69 (3603651). PE 11/23/2023 – Present to BROWN RRR EMBLEM J3541 (3886910).

AAA 18049055. Brown Ms Quanah 505B is an amazing beef cow. She may be one of the most experienced cows in the offering and her progeny in the ABG Dispersal will only make you understand why. Her phenotype, feet, udder and production ability have been replicated in the ABG program to make outcross, elite SimAngus cattle. She has withstood two generations of genetic trend and still more than holds her own for marbling, \$B, and \$C. Her Angus production record is impressive and yet more impressive are the daughters that you find throughout the ABG catalog. She has worked really well in transplant and the group of daughters that are wet 2-year olds in the fall group are head turners.

J1525 >> Daughter of Lot 160. Sells as Lot 162.

J1509 >> Daughter of Lot 160. Sells as Lot 167.

H0025 >> Daughter of Lot 160. Sells as Lot 59.

J1021 >> Daughter of Lot 160. Sells as Lot 14.

Elite Angus Donor

K2515 >> Daughter of Lot 160. Sells as Lot 240.

FALL PAIRS

We expanded the ABG herd into fall calving cows because we saw a need for additional SimAngus bulls in the March RA Brown Bull Sale and we wanted to diversify our marketing efforts between both March and October bull sales. The adventure to start a second calving herd has been awesome and we have learned so much cracking into another calving window. We largely built the fall calving females from existing ABG cow families but did acquire a large group of open heifers from our friends at Gibb's Farms the fall of 2018. We have long respected the Gibb's family for their commitment to genetic improvement and the leadership in the production of outstanding SimAngus cattle. These cows all have calves at side, some from our commitment to embryo transfer, some resulting from AI matings and some to the high quality herd bulls that we have accessed at ABG. The hardest decision about the sales was to do it and get everything completed by December 19th. The second hardest decision was what made the most sense regarding breeding the fall females. After much discussion we decided to lean on the herd bull power we had at ABG. The fall calving females have been managed in two groups and have been exposed to Redhill Countryman 81J and Brown RRR Emblem J3541. We could not be more excited to have these two potent herd sires breeding on this set of high value, fault free females. The fall opens were cycled and bred to C-3 Next Up NS B220 J939, followed by clean up natural service. We will offer more details as we get closer to sale time but we will offer a leave and breed option so that we ensure that as many of these fantastic fall cows settle prior to the new owners taking possession. Please ask questions regarding our intent to assist any customer with making these pairs as profitable as possible.

PE 10/30-Present to REDHILL COUNTRYMAN 81J (3953944).

This Genesis sired daughter out of Brown Ms Quanah 505B really is exciting. J1520 ranks in the top 3% and 2% of the breed for API and TI. This cow's type and kind will hang with most any bovine and when you see her perfect udder structure it screams longevity. The Redhill Countryman bull calf at her side has huge genetic value for the new owner. Future donor potential in this elite female.

PE 10/30-Present to REDHILL COUNTRYMAN 81J (3953944).

Another of the high ranking LBRS Genesis x Brown Ms Quanah 505B daughters. This stunning daughter has a bull calf at side sired by JC Talon. As you have read in other footnotes we are so thankful to have been able to find 505B from the RA Brown Ranch to inject outcross Angus genetics into our program. What a great mating to make valuable SimAngus females.

 J1514 is a KBHR High Road daughter out of the A384 donor dam. She ranks in the top 5% of the bred for both API and TI. Take a look at her JC Talon sired heifer calf at side, she's got her entire production lifetime ahead of her.

One of the striking JC Talon daughters selling. Going forward the genetics that set themselves apart for efficiency and resource utilization will be what everyone is seeking. After years of intake data from RA Brown, we can confidently say these Talon daughters will set the mark for creating and replicating some of the most efficient SimAngus genetics today.

PE 10/30-Present to REDHILL COUNTRYMAN 81J (3953944).

The phenotype of this female should get us all excited. J1507 is out of a full sister to Hook's Admiral, she combines two elite cow families in our breeding history. Lots of mating flexibility with this awesome female.

One of the few JC Huron sired heifers in the sale. Really appreciate this heifer for how well designed and complete she is. Top 5% and 2% respectively for API and TI.

 K2506 represents the first of 4 full sisters from one of the more interesting flushes at ABG. A daughter of Connealy Confidence Plus and a high producing Wide Range daughter that has been outstanding. They are very similar physically, all very elite structured females. Genomics have sorted them a bit but all represent outcross SimAngus genetics that are really high value.

AAA 20670503. If someone is doing their homework this might be a steal on sale day. One of the few purebred Angus heifers and she is absolutely killer looking. Sire by the hard to find Connealy Confidence Plus and the proven Brown Ms. Quanah 505B. We flushed 505B in cooperation with the RA Brown team and I am glad we did. In March there will be a number of bull calves selling in Throckmorton that are litter mates and they are equally as good.

ASA QUICK REFERENCE TO EPDS, INDEXES AND \$VALUES

EXPECTED PROGENY DIFFERENCES (EPDS): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing in what units they are expressed. For example, if the above case referred to weaning weight EPDs, sire A would be expected to sire 15 pounds more weaning weight than sire B. If calving ease was the trait, sire A would be expected to sire 15 percent more unassisted births in first-calf heifers; in other words, if sire B sired 30 assists in a group of 100 heifers, we would expect sire A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For more detailed information about EPDs and \$ indexes, visit www.simmental.org.

Listed below are the units in which ASA EPDs are expressed:

ALL-PURPOSE INDEX (API): Dollars per cow exposed under an all-purpose-sire scenario.

BACK FAT (BF): Inches of carcass backfat at 475 days.

BIRTH WEIGHT (BW): Pounds of birth weight.

CALVING EASE (CE): Percent of unassisted births when used on heifers.

CARCASS WEIGHT (CW): Pounds of carcass weight at 475 days.

DOCILITY (DOC): Percent of offspring receiving a disposition score of 1 (docile).

MATERNAL CALVING EASE (MCE): Percent of unassisted births in first-calving daughters.

MILK (MLK): Pounds of weaning weight due to milk.

MARBLING (MARB): Carcass marbling score at 475 days.

MATERNAL WEANING WEIGHT (MWW): Pounds of weaning weight due to milk and growth.

RIBEYE AREA (REA): Square inches of carcass ribeye at 475 days.

TERMINAL INDEX (TI): Dollars per cow exposed under a terminal-sire scenario.

WEANING WEIGHT (WW): Pounds of weaning weight.

YEARLING WEIGHT (YW): Pounds of yearling weight.

YIELD GRADE (YG): Carcass yield grade score at 475 days.

\$ INDEXES: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide pieces of the economic puzzle. This is where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on integrated commercial production. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

ALL-PURPOSE INDEX (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

TERMINAL INDEX (TI): Evaluates sires for use on mature Angus cows with all offspring put on feed and sold grade and yield.

For more detailed information about EPDs and \$indexes, visit: www.simmental.org
